About Us

You can arrange your pages in hierarchies, for example you could have an "About" page that has "Life Story" and "My Dog" pages under it. There are no limits to how deeply nested you can make pages.

Template

Default Template

Some themes have custom templates you can use for certain pages that might have additional features or custom layouts. If so, you'll see them above.

Edit Page

Provides for easy updating of existing pages using a WYSIWYG editor. Can specify the 'parent' page to manage page tree structure. Can also specify what custom template to use for this page to customize the layout and presentation of content.

About Us

You can arrange your pages in hierarchies, for example you could have an "About" page that has "Life Story" and "My Dog" pages under it. There are no limits to how deeply nested you can make pages.

Template

Default Template

Some themes have custom templates you can use for certain pages that might have additional features or custom layouts. If so, you'll see them above.

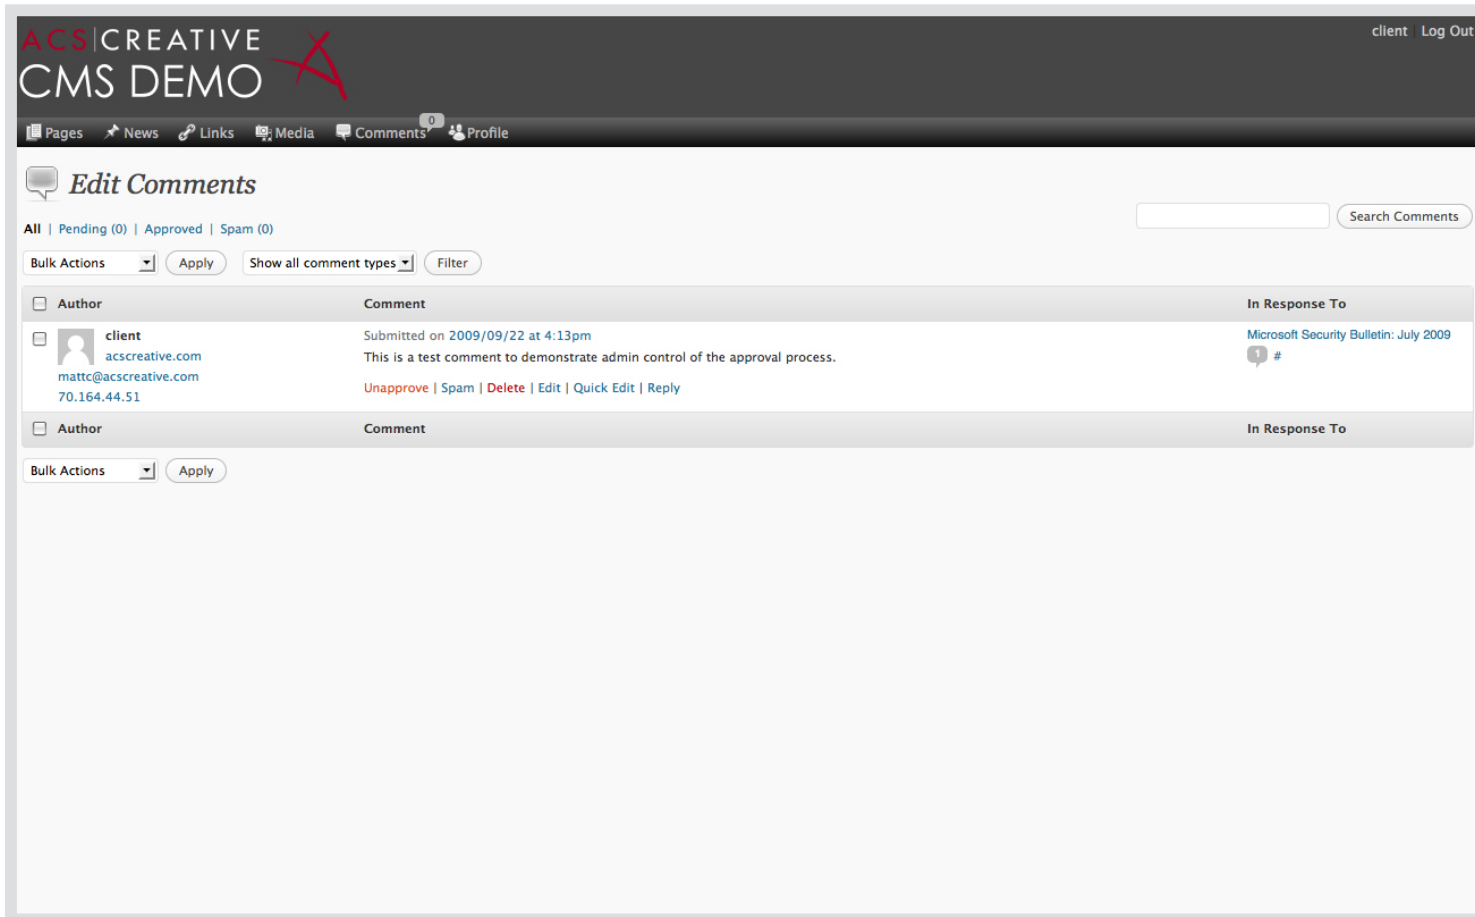

Edit Page (HTML)

Advanced users looking to more fully customize the presentation of content may utilize the HTML editor.

The screenshot shows the 'Edit Post' interface for the ACS Creative CMS Demo. The page title is 'Microsoft Security Bulletin: July 2009'. The interface includes a navigation menu with 'Pages', 'News', 'Links', 'Media', 'Comments', and 'Profile'. A toolbar offers 'Visual' and 'HTML' editing modes. The main content area contains the text: '<p>This is an example post. The content here can be displayed and styled in a variety of ways.</p>'. The right sidebar features a 'Publish' section with 'Preview Changes', 'Status: Published', 'Visibility: Public', and 'Published on: Sep 2, 2009 @ 10:32'. Below this is a 'Categories' section with 'All Categories' and 'Most Used' tabs, listing categories like 'Industry Level', 'News Releases', 'Cyber-Threat', 'About Us', and 'Uncategorized'. The 'Cyber-Threat' category is selected. At the bottom, there is a 'Word count: 18' and 'Last edited by client on September 16, 2009 at 2:52 pm'.

Edit Post

News postings and newsletter articles may be updated in both WYSIWYG and HTML views as well. Post categories help to organize content, providing users with related readings and more advanced search options.

The screenshot shows the 'Edit Comments' interface of the ACS Creative CMS Demo. The header includes the site name 'ACS CREATIVE CMS DEMO' and a user profile 'client Log Out'. A navigation bar contains links for Pages, News, Links, Media, Comments (with a '0' notification), and Profile. The main content area is titled 'Edit Comments' and features a search bar and filters for 'All', 'Pending (0)', 'Approved', and 'Spam (0)'. Below this, there are controls for 'Bulk Actions' and 'Apply', along with a 'Show all comment types' dropdown and a 'Filter' button. A table displays a list of comments with columns for 'Author', 'Comment', and 'In Response To'. The first comment is from 'client' (acscreative.com) submitted on 2009/09/22 at 4:13pm, with the text 'This is a test comment to demonstrate admin control of the approval process.' and a link to 'Microsoft Security Bulletin: July 2009'. The table also shows 'Unapprove', 'Spam', 'Delete', 'Edit', 'Quick Edit', and 'Reply' actions for each comment. At the bottom, there are additional 'Bulk Actions' and 'Apply' controls.

Comment Management

Approval processes may be put into place to manage the comments users leave in articles and postings. Admins may eliminate spam messages and edit out unwanted language prior to approving user comments.
