

Help Us Finish the Job on Senator McCain's Anti-supplement Bill!

Your Help is Needed Now!

Senator McCain's mis-named Dietary Supplement Safety Act (DSSA) would repeal key legislative protections for supplements. It would give the FDA arbitrary and absolute authority to pre-approve a discrete list of supplements and dosages while banning all others. This would almost certainly lead to a highly restrictive European-style regime with very few approved supplements and dosages.

McCain's DSSA bill is now on the ropes. Legislators have been

overwhelmed by a massive outpouring of messages from constituents opposing McCain.

In private conversations within the Senate, McCain has bowed

to the pressure and agreed to withdraw support for the worst provisions of the DSSA. But so far he has remained publicly silent about his inten-

tions. It's critical that we receive confirmation from McCain. Now is the time to keep the pressure on to ensure the final defeat of DSSA! Contact your senators to express your opposition today!
