

Tell Congress FDA's Draft Guidance on Supplements is Bad for America. It's Time to Stand Up and Take Action!

September 8, 2011

Take Action - Call-in to Congress!

Supplement availability and affordability is being attacked by the FDA! The FDA proposed supplement guidance would remove natural products from the shelves and would make it increasingly more difficult for new supplements to be developed and sold.

Call: U.S. Capitol Switchboard at (202) 224-3121 and ask for your senators' and/or representative's office.

Say: My name is [Name] and I am a constituent of [Representative's name].

- I am very concerned about the new FDA draft guidance on dietary supplements and new dietary ingredients.
- When the Dietary Supplement Health and Education Act was passed, **Congress intended there be a simple notification system for new supplements. But now the FDA is turning it into a pre-approval scheme**—one that Congress never intended. This will reduce the number of supplements sold and increase the cost of those that remain
- I request that Congress **direct the FDA to carefully review their** draft guidance, and unless they amend the guidance to reflect my concerns, to call hearings at the end of the review process. Thank you for your time.

Visit www.ANH-USA.org today and **learn more about how you can help promote natural health.**
