The newly appointed editor-in-chief of the AAAS *Science* family of journals wrote an editorial, "The communities of Science," in a recent issue of *Science* magazine. Jeremy M. Berg, Ph.D., describes science as a profoundly social activity. He said that discoveries do not come from a single individual but from groups of individuals at different stages in their careers, with diverse interests, and collaborating with shared results and ideas.

It is with great enthusiasm that KU Integrative Medicine invites you to join our stellar group of speakers who have teamed up to demonstrate that collaboration around intravenous vitamin C is a profoundly social activity. This is an accomplished group of scientists with the background to describe the expanding science of intravenous vitamin C from the basic science underpinning to the practical clinical use.

This conference is the first of its kind and we invite you to be there in Kansas City September 30 and October 1, 2016.

**Keynote Speaker:** Mark Levine, M.D.

**Program Speakers:** Jeanne Drisko, M.D., Qi Chen, Ph.D., Lewis Cantley, M.D., Daniel Monti, M.D., Alpha Fowler, M.D., Ramesh Nataragan, Ph.D., Joseph Cullen, M.D., Gary Buettner, Ph.D., John Hoffer, M.D.
