

# THE ARIZONA STATEMENT

## on Reversing America's Chronic Disease Epidemic

**I hereby agree to becoming a co-signatory to the Arizona Statement on Reversing America's Chronic Disease Epidemic, ahead of its public release on April 9, 2026.**

I acknowledge that the Statement is a consensus statement co-authored by Rob Verkerk, PhD, and Jonathan Emord, Esq., respectively Executive Director and General Counsel for ANH-USA that arose from inputs, including my own, at a summit in Scottsdale, AZ, with a broad range of stakeholders on February 10-11, 2026. The Statement aims to bring together leading physicians, scientists, policy specialists, legal experts, and other thought leaders around a shared call for reform: to address the structural barriers that are driving chronic disease, restricting informed choice, and limiting access to effective preventive and therapeutic options.

Please complete and submit your details, which will appear on the website as you have entered them:
